

iForce™

Integrated public safety vehicle solution

**Rockwell
Collins**

Rockwell Collins iForce integrates radio, video and computer functions into one easy-to-use system.

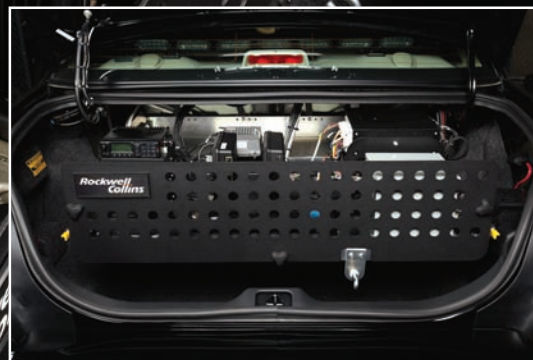

Today's law enforcement officers are faced with a tougher job than ever before. Along with their primary responsibility to enforce local laws, protect the public, manage and regulate traffic on freeways and county roads, officers are faced with the growing need to provide on-site emergency law enforcement — often independently from central control.

Rockwell Collins iForce allows officers to easily cross band with other first responders at an accident, emergency or crime scene. iForce integrates radio, video and computer functions into one easy-to-use system that enhances an officer's on-site communications, control and security needs while ensuring public safety.

Ruggedized, protected and highly reliable, the iForce integrated system is easily accessible in the trunk space saving rollout drawer.

Configurable status bar

Displays real-time system status and access to integrated radio and camera controls

Radar display

Radio status and controls

Lights/siren status

CAD/RMS message status

Camera status and controls

System status and alerts

Easy tab selection bar displays interface for equipment functions

Patrol screen

Consolidates most used functions and provides access to:

- › TALK radio information
- › Proximity list
- › Emergency warning lights
- › MEMO popup
- › AM/FM audio listen/mute
- › EXT AUDIO popup

Lights/siren screen

Makes available detailed control features for light bar and siren operations

Radio screen

Provides access to radio control and configuration features for all system-integrated mobile radios

Radar screen

Makes available detailed control and display features for the radar system

AM/FM screen

Makes available AM/FM radio tuning and control

CAD screen

Our real-time operating system manages Windows® computers that run your CAD, RMS or any Windows applications such as Microsoft® Office.

Camera screen

Makes available the detailed control and display features for the camera system

Configurable hand control device

Provides a secondary form of system control that is easily accessible to the officer in a highly dynamic environment

Building trust every day.

Rockwell Collins delivers smart communication and aviation electronic solutions to customers worldwide. Backed by a global network of service and support, we stand committed to putting technology and practical innovation to work for you whenever and wherever you need us. In this way, working together, we build trust. Every day.
